

Cruisemate Plus

Asymmetrical Spinnaker

From the creators of the “StarCut” (the original Tri-Radial Spinnaker) from the 60s, the “Elipson” from the 80s and the Series2000 from the early 2000s comes the Checkmate full radial spinnaker.

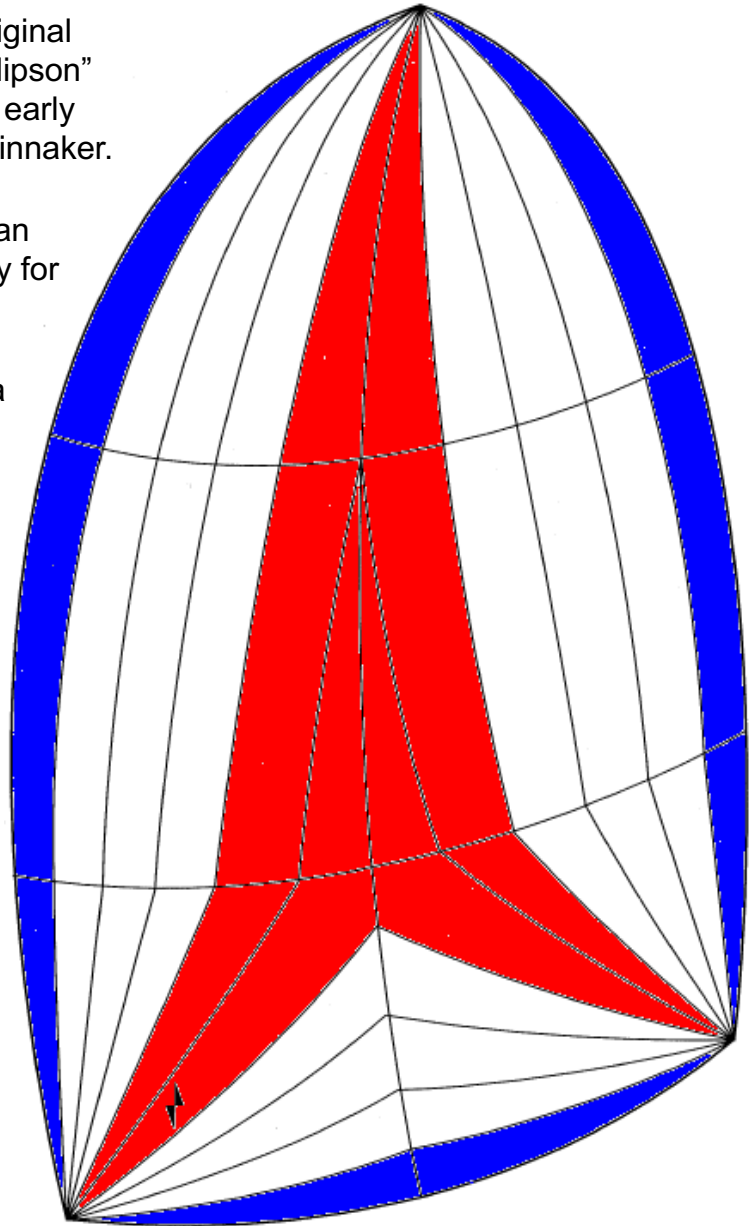

The Banks Triradial design provides both an excellent design shape and great durability for many seasons to come..

The **Banks Cruisemate Asymmetrical** is a hybrid design combining the best of our Checkmate racing spinnaker with our Starcruise cruising spinnaker.

This design works great with or without a spinnaker pole!

Features & Options
